

Nilesh Chhipa

Senior Product Designer

Senior Product Designer with 6 years across enterprise and consumer products. I think in systems, execute with craft, and design closer to production. Past work includes H&M, Airbnb, and the Government of Saudi Arabia.

Work Experience

Sr. Product Designer @ Horizontal Digital

SEPTEMBER 2024 - APRIL 2026

- Owned end-to-end design of a B2B electricity connection portal for the Saudi Electric Company, mapping and simplifying complex multi-step enterprise workflows for government and commercial clients, reducing process friction and delivering a measurably improved experience at scale.
- Drove a 12% improvement in task success rate through structured iterative prototyping and moderated usability testing, identifying critical drop-off points across the portal's application and approval flows and resolving them before production.
- Embedded within cross-functional agile teams alongside developers, product managers, and government stakeholders, translating complex regulatory and operational requirements into design solutions that shipped accurately and on schedule.
- Established and maintained a component library and design system in Figma defining reusable patterns, tokens, and documentation that standardized UI across the B2B portal and reduced design-to-development friction.

Product Designer → Sr. Product Designer @ H&M (Hennes & Mauritz)

AUGUST 2020 - AUGUST 2024

- Identified friction points across the mobile app's product discovery and browsing flow, redesigned key interactions that drove an 8% increase in click-through rate and a 3% reduction in exit rate, directly improving conversion across H&M's global mobile shopping experience.
- Ran end-to-end user research including interviews, behavioural data analysis, and usability reviews to surface design opportunities within the clothing app's core shopping journey, findings directly shaped design decisions across multiple feature cycles.
- Partnered with product managers, engineers, and brand stakeholders in agile sprints to produce wireframes, interactive prototypes, and high-fidelity mockups ensuring design was accurately implemented from concept to production across iOS and Android.
- Facilitated design reviews and moderated usability testing sessions with real users, synthesising feedback into actionable iterations that reduced friction in key flows including product browsing, size selection, and checkout.
- Contributed to H&M's shared component library auditing existing patterns and aligning mobile app components with the broader design system to ensure consistency across iOS and Android.

Intern Product Designer @ Airbnb

APRIL 2020 - JULY 2020

- Contributed to the redesign of Airbnb's B2B payment system, identifying UX friction points across business client payment flows and delivering cleaner interaction patterns that simplified the end-to-end payment experience.
- Supported the evolution of Airbnb's internal design system, auditing existing components, ensuring consistency across payment-related UI, and contributing reusable patterns to the shared component library in Figma.

Education

Bachelor of Engineering in Computer Science @ PIT, Jaipur, India

FEBRUARY 2017- APRIL 2020

UX Design Certification @ Figma

JANUARY 2020

Skills

- User Research
- Interaction Design
- Visual Design
- User Testing
- Prototyping
- Design Systems
- Information Architecture
- Accessibility (WCAG)

Tools

- Figma, FigJam
- Maze, Hotjar
- Notion, Github, Storybook
- Claude, Gemini, ChatGPT (Research)
- Adobe Creative Suite

Additional

- Blender, Houdini, Cinema 4D (3d/Motion)
